

# ENVIRONMENT POLICY VEYHL COMPANY

## ENVIRONMENT POLICY VEYHL COMPANY

The aim of the company is to be able to create and ensure a desirable environment for all groups of people. All of us are anxious to avoid the foreseeable negative effects on the natural habitat of plants, animals and human beings. Our contributions, which we make within our ecologically orientated activities represent a conscious decision to make sure that the ecological standpoint is taken into consideration at all times. Ecology and economy are not irreconcilable; rather two parts of a whole that cannot be ignored.

### Resources

We seek to use all available resources in a responsible and economic fashion. We attempt to implement only such work materials, which are still in ample supply or alternatively can regenerate naturally and once consumed and processed, require a minimum of energy and do not represent a danger to the environment.

### Product concept

We view a high degree of quality and longevity of products in combination with a recyclable structure as an important contribution to environmental protection and conservation of natural resources.

### Prevention

We pledge ourselves to a preventative form of environmental protection. Within this context we pay particular attention to aspects such as:

- The consideration of current and all foreseeable legal rulings
- The environmental friendliness of materials, products used and technology
- All types of emissions
- Avoidance of rubbish prior to recycling and disposal thereof
- Avoidance of any sources of danger in the event of disturbance.

### Procedures

By means of well-planned and governed procedures we wish to ensure at all times that negative effects on the environment are avoided. This is vouchsafed by:

- The planning and evaluation of effects on the environment of individual and overall operational procedures
- The monitoring of all procedural parameters relevant to environmental issues
- An efficient and effective guiding involvement in the event of any deviation

### Partnership

We wish to evaluate all ecological requirements together with our suppliers, clients and employees and give the same due consideration in all our transactions. We value an open and objective dialogue with our fellow human beings and the general public and are wholly committed to our ecological responsibilities.

### Employees

Each and every employee in our company is equally responsible for achieving our environmental aims. We are involved in encouraging an environmental consciousness by means of information, integration and instruction.

### Verbesserungen

By means of an ecologically inspired initiative and activity and a constant analysis of weak points whether with respect to (1) products, (2) organisational procedures, (3) main and auxiliary procedures, (4) our client service sector we constantly seek to achieve improvement.
