

TECHNICAL PRODUCT INFORMATION  
**quattro**

type	quattro column	quattro cube
length	400 mm	400 mm
depth	400 mm	400 mm
height	2000 mm	400 mm
colour	    	    

Version: 2018.01

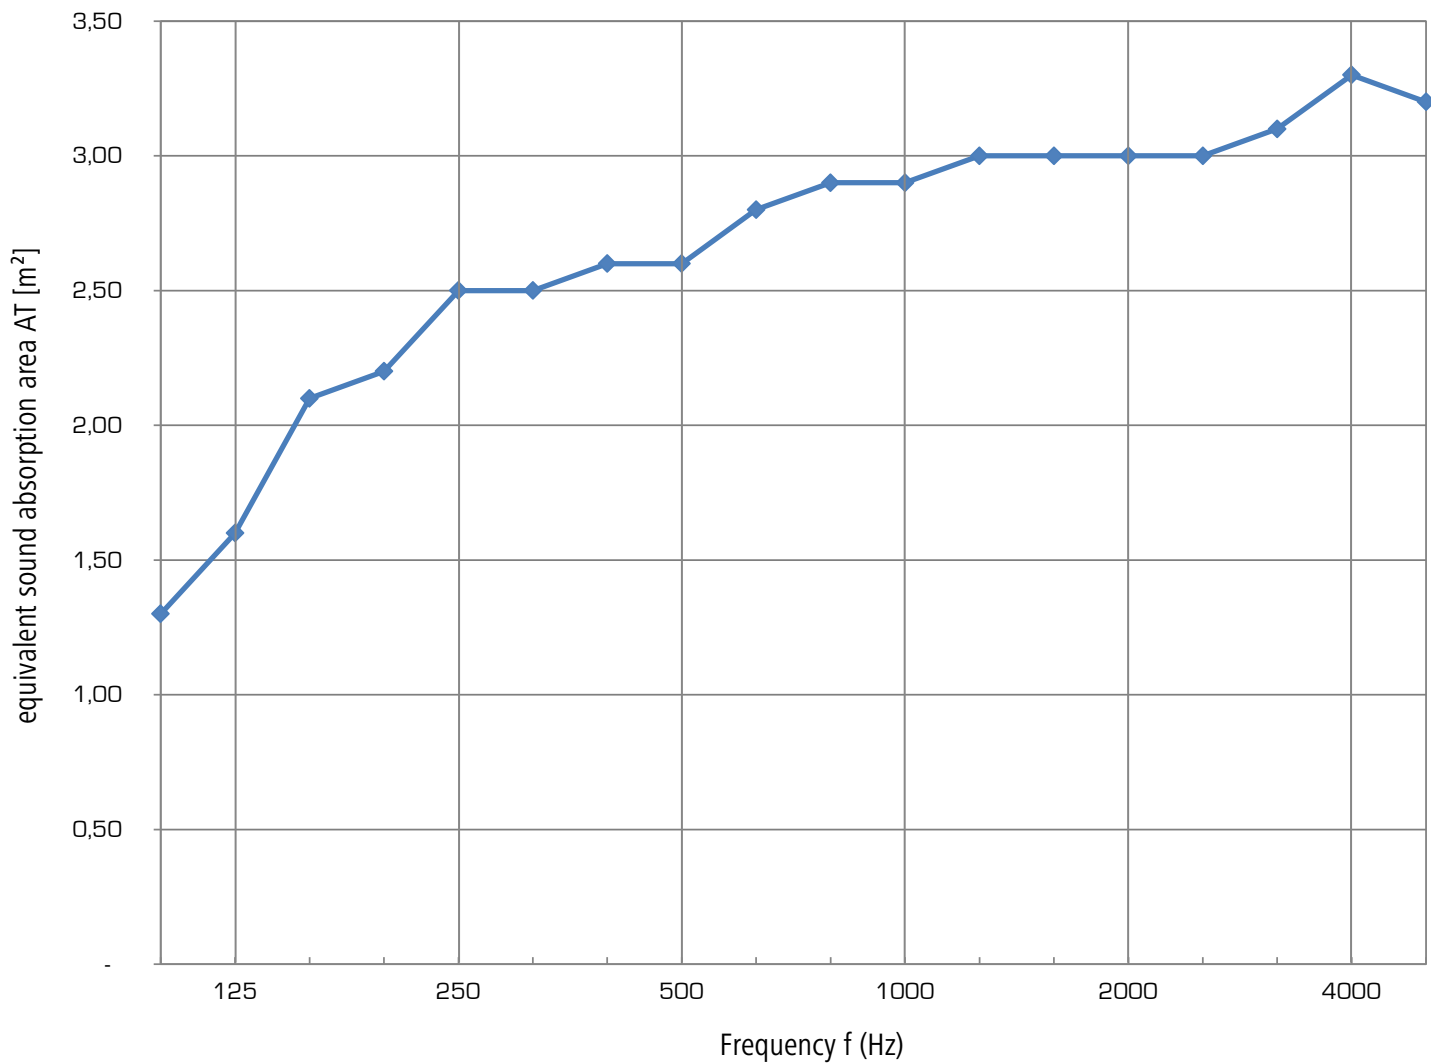

The main use of the acoustically effective quattro column can be found in sound-reflecting corner areas. Based on high tech acoustic fibre panels quattro provides a reduction of the mirror sound and of the reverberation time in open spaces. This acoustical solution is available as quattro column or as quattro cube.

Veyhl

## equivalent sound absorption area

The combination of several elements increases the acoustical effect (sound protection and sound absorption) of the quattro products by placing them in function of the specific space situation. The sober and timeless design of the acoustical absorbers is available in a selected colour range and offers a unique completion to open living and working areas. The sound absorption values can vary from colour to colour.
