

TECHNICAL PRODUCT INFORMATION  
**slider**

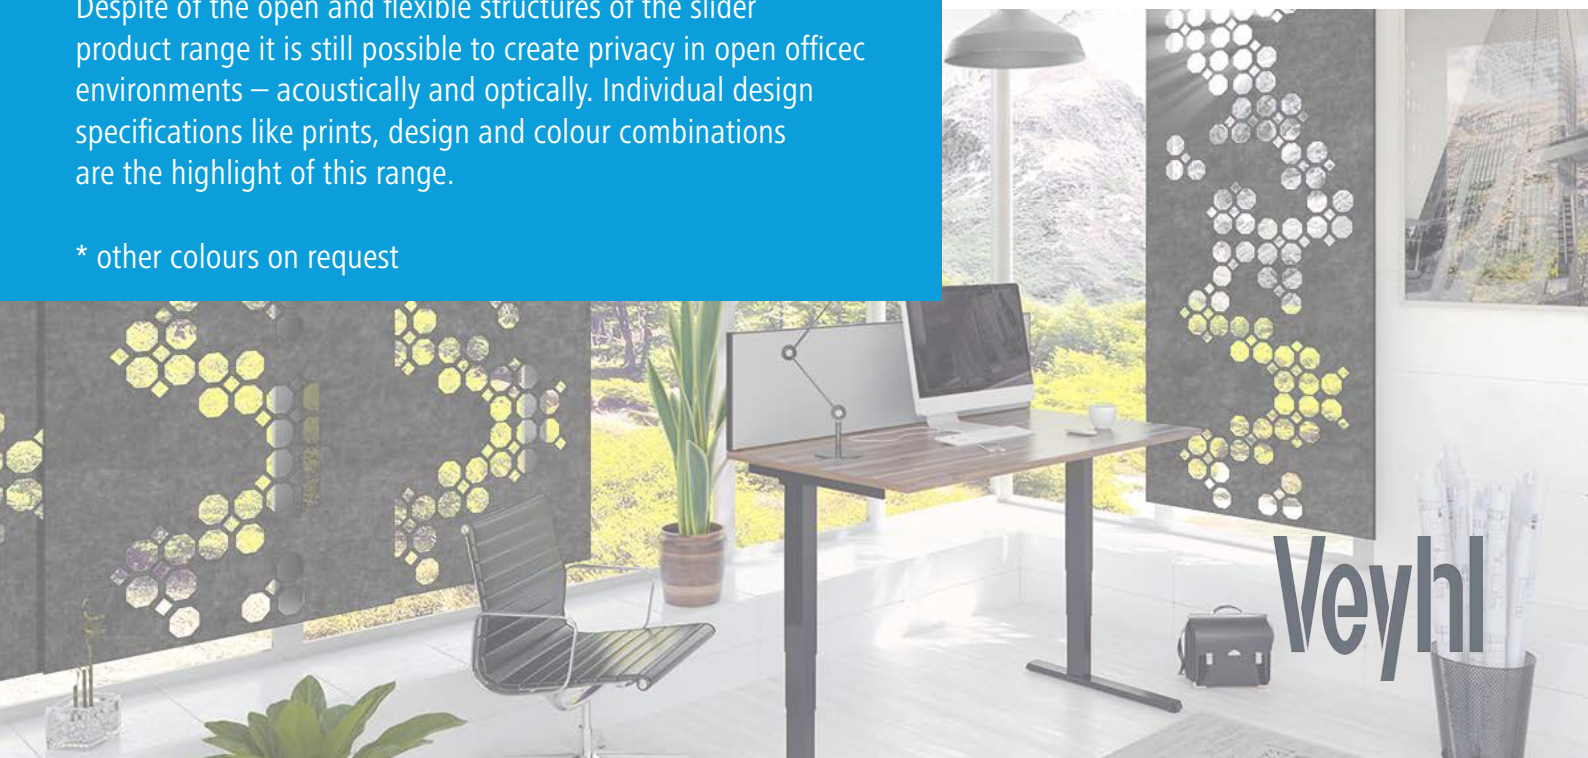

type	slider stripes	slider polygon
design		
width	950 mm	950 mm
thickness	8 mm	8 mm
height	2000   2500   3000 mm	2000   2500   3000 mm
colour	    	    
curtain rail	curtain rail length 1990 mm available in RAL 9016	curtain rail length 1990 mm available in RAL 9016

Version: 2018.01

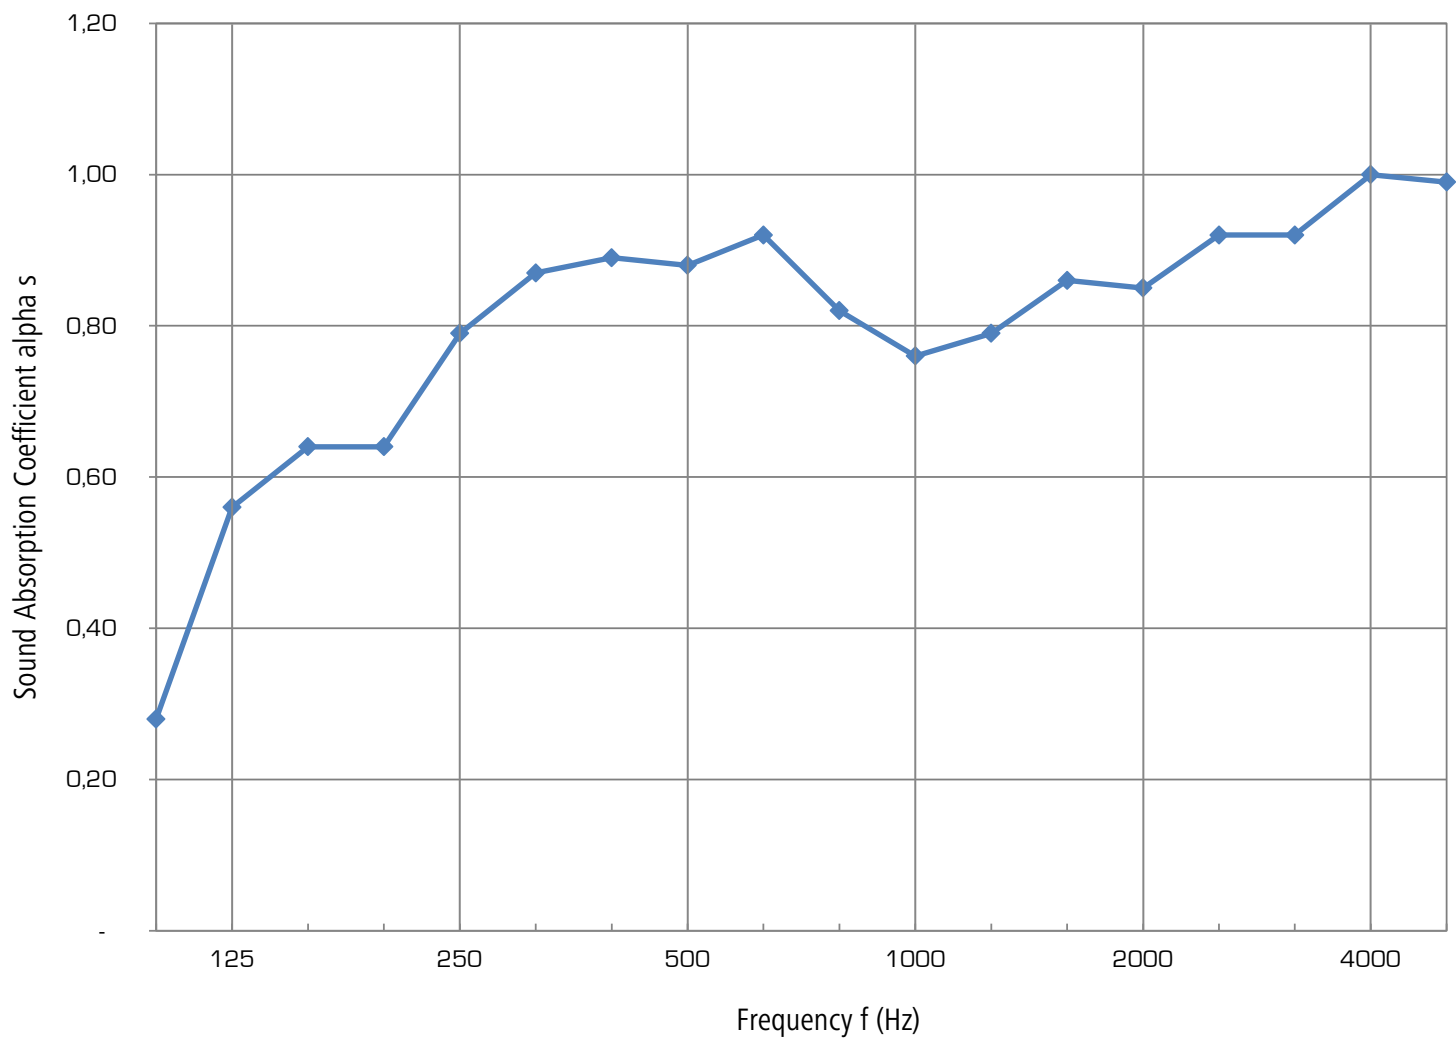

Despite of the open and flexible structures of the slider product range it is still possible to create privacy in open office environments – acoustically and optically. Individual design specifications like prints, design and colour combinations are the highlight of this range.

\* other colours on request

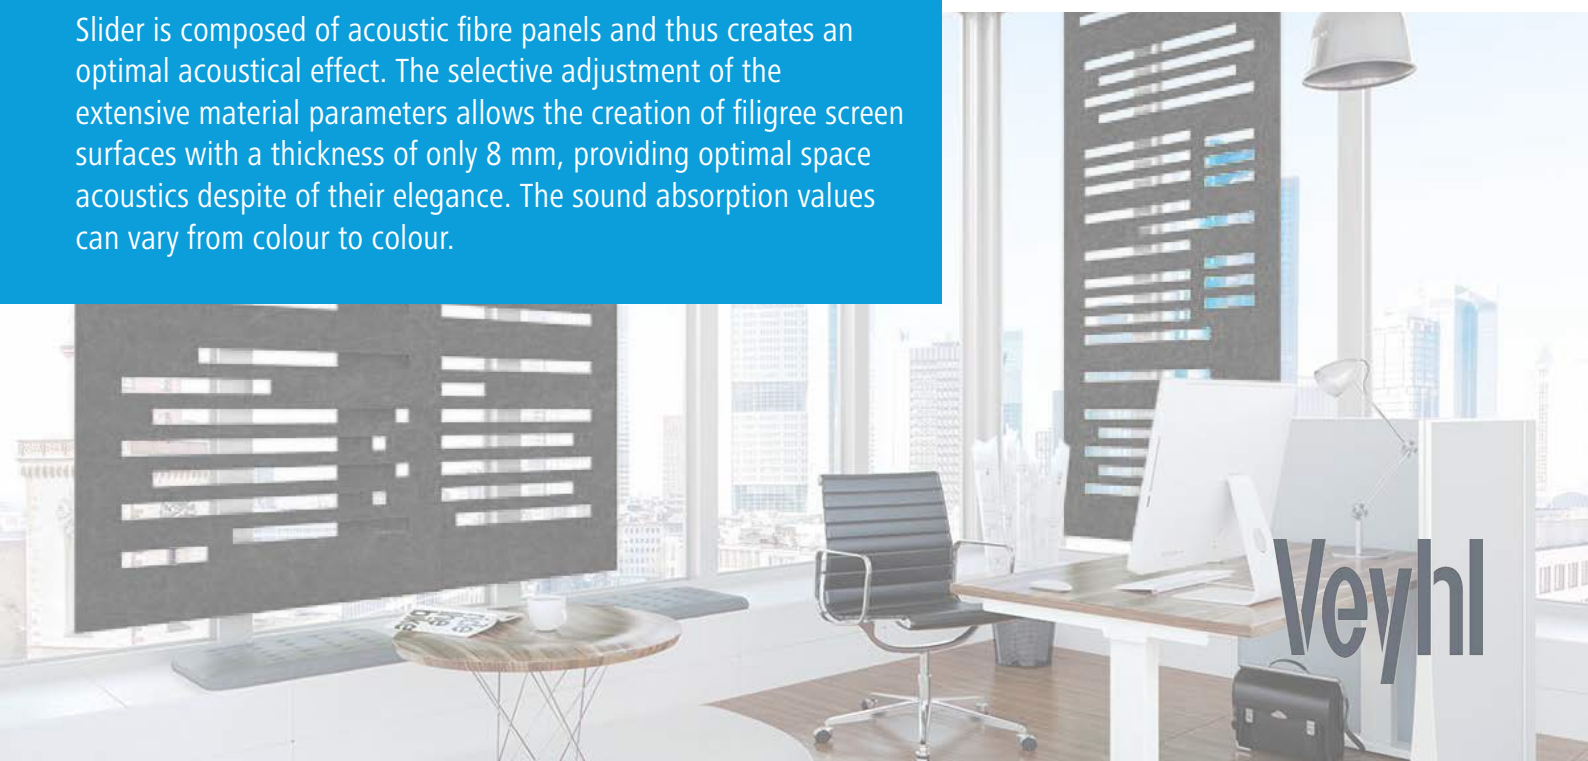

Veyhl

type	acoustic fibre panel
absorption class according to DIN EN ISO 11654	A ( $a_w$ 0,90)

Slider is composed of acoustic fibre panels and thus creates an optimal acoustical effect. The selective adjustment of the extensive material parameters allows the creation of filigree screen surfaces with a thickness of only 8 mm, providing optimal space acoustics despite of their elegance. The sound absorption values can vary from colour to colour.
